

Observing the Ducks

Observe the ducks near the otter and picnic area or at the Brandywine River next to the Zoo for 5 or 10 minutes. Read the types of behavior you and your group are looking for. The children may pass around this paper to see the drawings. They may write their initials in the box with each activity they see. Or the adult can put a checkmark in the box if the whole group saw the same duck behavior.

 Sleeping	 Taking off	 Feeding under water
 Feeding on top of water	 Making noise	 Swimming
 Washing	 Drinking	 Preening

This activity came from the Bronx Zoo Education Department, N.Y. Zoological Society.
